

## SECURITY SYSTEM CELLULAR TRANSMITTER SECURE & RELIABLE COMMUNICATION

### WHAT HAPPENS IF A BURGLAR OR OTHER EVENT CAUSES DISRUPTION OF YOUR TELEPHONE SERVICE?

To ensure that your security system is always in communication with our monitoring center, and to overcome situations where a home does not have an active telephone line (land line or digital voice over cable), Devcon offers a **Cellular Transmitter** that connects to your security system. Alarm signals are transmitted over this digital cellular line in addition to (or instead of) your telephone line. This is a very reliable primary method of transmission or may be used as backup to your traditional telephone line or cable in case the telephone line is cut or the cable goes down.

There is a one-time charge to the homeowner of **\$199.00** for the purchase and installation of this device. There is also a transmission fee of \$9.95 per month billed to the homeowner because we must obtain a cellular line from a cellular provider specifically for your system's communication. This transmission fee is less expensive than maintaining a telephone line. Ask us for details.

Call today for more information or to schedule your installation!
